The Engineer Who Asks One More Question

PROFILE

From the workshops of Chennai to the university halls of Passau, Annarhysa Albert has built a reputation not just for writing code, but for interrogating the systems that code creates.

A published AI researcher and full-stack developer, she has shipped production pipelines at Nokia, HyperVerge, and Codewalla — each role demanding fluency across model architecture and database schema alike.

Her thesis, colleagues say, is simple: clever is not enough. Useful is the standard.

CAREER ON RECORD

From Nokia’s Test Floors to Serverless AWS: Four Roles, One Standard

CODEWALLA • NOKIA • HYPERVERGE • BORNBHUKKAD

Codewalla, Pune — Promoted SDE I to SDE II within six months. Architected an imageKit wrapper for shisha.com, engineering the ETL caching layer and serverless AWS backend. Built full-stack features in Next.js across frontend and backend systems.

Nokia, Bangalore — SWE Trainee running performance checks on MantaRayNM systems via Robots, NAPET, Python, and Jenkins. Integrated Graylog for live log monitoring; resolved SonarQube violations for QA compliance.

HyperVerge, Chennai — Designed a fine-tuning pipeline for Llama 2-7B using PEFT methods, specialising the model in Python problem-solving. Nexus Spring ’24 ML Trainee.

Bornbhukkad — Applied transformer-based NLP models to scraped restaurant reviews, bringing food engineering principles to data science.

TECHNICAL ARSENAL

Full inventory of capabilities

Languages

Python • Java • C/C++ • GoLang • TypeScript • Shell • MATLAB • XML • JSON

AI & Machine Learning

ML • Deep Learning • LLMs • Fine-tuning (PEFT) • NLP • Transformers • Intelligent Automation

Data

SQL • NoSQL • Data Processing • Time-series Analysis • TF-IDF

Cloud & DevOps

AWS • Azure • Docker • Jenkins • JIRA • Git • Gerrit • GitHub

Frameworks

Next.js • React.js • Node.js • Vue.js • Spring

Spoken languages

English • German • Hindi

AWARDS & RECOGNITION

Microsoft Code; Without Barriers

’24 Winner

Smart India Hackathon

Round 3, ’23

Merit Scholarship SRM

3 years

Publications

2 papers

Open source (SWOC + SSOC)

’24
